## OBJECTIVE

---

To secure a position in a dynamic environment where I can actively learn, grow, and tackle real-world challenges on a daily basis

## SKILLS

---

### Programming Language

Python

### Front End

HTML & CSS

### Operating System

Linux & Windows

### Cloud Services

AWS(Amazon Web Services)

### MS Office

Powerpoint & Word & Excel

### Designing

Canva

## SOFT SKILLS

---

Team Collaboration

Time Management Mastery

Communication

Problem-Solving

## EDUCATION

---

### BCA - Bachelor of Computer Applications

B.S. Abdur Rahman Crescent Institute of Science and Technology

2020 - 2023

CGPA - 7.57

### MCA - Master of Computer Applications

SRM Institute of Science and Technology

2023 - 2025

Current CGPA - 8.28

## PROJECTS

---

### Leveraging AI&ML Crowd Management And Crime Prevention Through CCTV Network

Developed an AI-driven system using deep learning models to analyze live CCTV feeds, detecting anomalies like overcrowding and aggressive behavior. The system enhances public safety and optimizes resource allocation by leveraging existing surveillance infrastructure.

### Cyber Crime Reporting System Website

Developed a secure web platform for reporting and tracking cybercrimes. The system enables users to submit reports, track case progress, and access resources on cybercrime prevention. Designed to enhance public safety and streamline law enforcement efforts.
